NeoColab_REC_CS23231_DATA STRUCTURES

REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: a b c -

```
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
char item;
  struct Node* next;
  struct Node* prev;
}:
// You are using GCC
void insertAtEnd(struct Node** head, char item) {
 struct Node *nd=(struct Node*)malloc(sizeof(struct Node));
 if (nd==NULL)return;
 nd->item=item;
 nd->prev=NULL;
 nd->next=NULL;
 if (*head==NULL){
  *head=nd;
    return;
```

```
struct Node *temp=*head;
 while(temp->next!=NULL){
   temp=temp->next; V
 temp->next=nd;
 nd->prev=temp;
void displayForward(struct Node* head) {
  while(head!=NULL){
    printf("%c ", head->item);
    head=head->next;
  printf("\n");
void displayBackward(struct Node* tail) {
  while(tail!=NULL){
    printf("%c ", tail->item);
    tail=tail->prev;
  }
  printf("\n");
void freePlaylist(struct Node* head) {
  struct Node *temp;
  while(head!=NULL){
    temp=head;
    head=head->next;
    free(temp);
  }
}
int main() {
  struct Node* playlist = NULL;
  char item;
  while (1) {
    scanf(" %c", &item);
    if (item == '-') {
      break;
    insertAtEnd(&playlist, item);
```

```
struct Node* tail = playlist;
while (tail->next != NULL) {
  tail = tail->next;
}

printf("Forward Playlist: ");
displayForward(playlist);

printf("Backward Playlist: ");
displayBackward(tail);

freePlaylist(playlist);

return 0;
}

Status: Correct

Marks: 10/10
